

GIORGI APHRIDONIDZE

Full Stack Web Developer | Next.js React Node Python MySQL & MongoDB

Email: giorgiaphridonidze08@gmail.com | Location: Tbilisi, Georgia

Portfolio: portfolio-app.vercel.app | LinkedIn: linkedin.com/in/giorgi-aphridonidze | GitHub: github.com/Apridonidze | Upwork: www.upwork.com/giorgi-apridonidze

SUMMARY

Full-Stack Developer specializing in designing scalable, secure, and high-performance web applications using Next.js, React, TypeScript, Python, FastAPI, Node.js, MySQL, and MongoDB. Experienced in developing REST APIs, authentication and authorization systems (JWT, RBAC), distributed task processing with Redis and BullMQ, database architecture, automation solutions, and administrative platforms. Passionate about writing clean, maintainable code and delivering reliable, production-ready software with a strong focus on performance, security, and user experience.

PROFESSIONAL EXPERIENCE

Fullstack Developer - Upwork Freelancing

May 2026 - Current

- Engineered a distributed automation platform processing 50,000+ Instagram profiles daily through concurrent account orchestration and proxy infrastructure
- Designed JWT-based authentication and Role-Based Access Control (RBAC) securing administrator and worker access across the platform
- Built administrative tooling for managing users, bot accounts, proxies, scraping tasks, activity logs, and system events
- Developed automated account lifecycle management supporting session injection, credential updates, profile management, health monitoring, and recovery
- Architected distributed task scheduling that automatically balanced workloads, recovered failed jobs, and eliminated task interruption during account failures
- Implemented automated challenge resolution, proxy rotation, session recovery, and account failover to maximize scraping uptime
- Built configurable data extraction pipelines supporting bulk task imports, multiple scraping modules, progress tracking, and CSV exports
- Optimized backend performance for thousands of concurrent scraping tasks while maintaining high system reliability

Technologies: Next.js, TypeScript, Python, FastAPI, MySQL, MongoDB, REST APIs, JWT, RBAC, Instagrapi, Docker, Git, GitHub, Render

Fullstack Developer - Upwork Freelancing

Aug 2026 - Current

- Contributed to a B2B sourcing platform that matches companies with manufacturers capable of producing customized products to their exact specifications (e.g., a company needing sunscreen formulated with specific OTC actives and supplements)
- Built a distributed manufacturer-scraping system using Redis and BullMQ to orchestrate and distribute scraping jobs concurrently at scale
- Parsed and enriched scraped manufacturer data, and used Groq to normalize inconsistent supplier and product data into structured, standardized records
- Designed an event-driven matching engine, also powered by Redis and BullMQ, that automatically triggers on new buyer requirements or newly scraped manufacturer data
- Implemented hybrid hard- and soft-matching logic across product specifications and capabilities to score and rank candidate manufacturers
- Returned ranked manufacturer matches with confidence scores, connecting buyers to qualified suppliers for their specific requirements

Technologies: Node.js, Express.js, MongoDB, Redis, BullMQ, Git, GitHub, Docker

Backend Developer - Independent Contractor

Jan 2026 - Feb 2026

- Designed and implemented REST APIs powering production full-stack applications
- Optimized relational database schemas improving query performance and maintainability

- Implemented secure JWT authentication and environment-based configuration management
- Refactored backend architecture reducing runtime errors and improving long-term maintainability
- Collaborated on production deployments and backend feature delivery

Technologies: Node.js, Express.js, REST APIs, MySQL, Git, GitHub

Frontend Developer - Upwork Freelancing

Jan 2026 - Jan 2026

- Developed responsive and reusable user interface components using modern frontend development practices
- Translated Figma designs into pixel-perfect, production-ready web interfaces
- Optimized applications for cross-browser compatibility, responsiveness, and consistent user experience across devices
- Collaborated with clients to transform design requirements into maintainable frontend solutions

Technologies: HTML5, CSS3, Bootstrap, JavaScript, Git, GitHub

Frontend Developer - Upwork Freelancing

Jul 2023 - Jul 2023

- Developed responsive authentication interfaces including login and registration workflows using HTML5, CSS3, and JavaScript (ES6+)
- Implemented client-side validation to improve data integrity and enhance user experience
- Ensured cross-browser compatibility and responsive layouts across desktop, tablet, and mobile devices
- Delivered production-ready frontend features within project deadlines while maintaining code quality and usability standards

Technologies: HTML5, CSS3, JavaScript, Git, GitHub

PROJECTS

E-commerce - Fullstack Web Application

- Developed a production-ready full-stack e-commerce platform featuring secure authentication, product catalog, shopping cart, order processing, and Stripe payments
- Designed scalable REST APIs and normalized MySQL database architecture
- Implemented role-based administrative dashboard for product and order management
- Integrated Stripe payment processing with webhook-based order verification
- Applied rate limiting, request validation, and JWT authentication to secure backend services

Technologies: React, Bootstrap, CSS, Node.js + Express.js, RESTful APIs, WebSocket, WebHooks, Rate Limiting, CORS, Stripe Integration, MySQL, Git, GitHub, Docker, Zod, .ENV

Driver Tickets App - Fullstack Learning Platform

- Developed a full-stack examination platform managing 1,000+ multimedia questions with structured content organization and exam workflows
- Designed scalable backend architecture, REST APIs, and database models to support efficient question management and content delivery
- Built responsive user interfaces and optimized application performance to deliver a seamless cross-device learning experience

Technologies: React.js, Node.js, Express.js, MySQL, JWT, REST APIs

SKILLS & TECHNOLOGIES

Frontend: Next.js, React.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Charts.js

Backend: JavaScript, TypeScript, Python, Node.js, Express.js, FastAPI, RESTful API, WebHooks, WebSocket, OAuth, JWT, Instagrapi, Redis, BullMQ, Rate Limiting, CORS, Zod

Database & Integrations: MongoDB, MySQL, Redis, Stripe Integration, SendGrid, Third-Party Integration

Tools: Git, GitHub, Docker, Postman, Vercel, Railway, Render

CERTIFICATIONS

Learning Docker - LinkedIn Learning - 2025
