

GIORGI APHRIDONIDZE

Full Stack Web Developer | Next.js React Node Python MySQL & MongoDB

Email: giorgiaphridonidze08@gmail.com | Location: Tbilisi, Georgia

Portfolio: portfolio-app.vercel.app | LinkedIn: linkedin.com/in/giorgi-aphridonidze | GitHub: github.com/Apridonidze | Upwork: www.upwork.com/giorgi-aphridonidze

SUMMARY

Full-Stack Developer experienced in building production web applications, automation platforms, distributed background-processing systems, and data-intensive internal tools. Work includes B2B lead generation, multi-channel outreach automation, large-scale data collection, business-data enrichment, and supplier matching systems. Experienced with Next.js, TypeScript, Node.js, Python, FastAPI, MongoDB, MySQL, Redis, BullMQ, Docker, REST APIs, and third-party service integrations.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Upwork Freelancing

Sep 2026 – Present

Developing a B2B lead generation and outreach automation platform that discovers and qualifies local service businesses, enriches contact information, and manages automated outreach across phone, SMS, and email.

- Built automated business discovery and qualification pipelines using Google Places data and configurable industry, location, rating, review, and contact criteria.
- Developed website-based contact enrichment and lead deduplication workflows for collecting publicly available business contact information.
- Designed distributed background processing with Redis and BullMQ for discovery, enrichment, outreach scheduling, messaging, calling, follow-ups, and monitoring.
- Integrated programmable voice and SMS workflows with Telnyx, including webhooks, delivery events, retries, call states, and automated follow-up sequences.
- Developed multi-stage lead pipelines with scoring, communication history, automated state transitions, campaign analytics, and fault-tolerant job processing.
- Built a centralized CRM-style dashboard for managing leads, outreach activity, campaign performance, worker status, conversion metrics, and data exports.

Technologies: Next.js, TypeScript, Node.js, Redis, BullMQ, MongoDB, Google Places API, Telnyx, Docker

Backend Developer — Upwork Freelancing

Aug 2026 – Aug 2026

Contributing to a B2B sourcing platform that connects companies with manufacturers capable of producing customized products according to detailed product requirements.

- Built distributed manufacturer-scraping workflows using Redis and BullMQ to orchestrate concurrent data-processing jobs.
- Developed pipelines for parsing, enriching, and standardizing inconsistent supplier and product information.
- Designed event-driven matching workflows that react to newly available buyer requirements and manufacturer data.
- Implemented hard- and soft-matching logic across product specifications and manufacturing capabilities.
- Generated ranked manufacturer candidates with confidence scores to support supplier selection.

Technologies: Node.js, Express.js, MongoDB, Redis, BullMQ, Docker, Git, GitHub

Full-Stack Developer — Upwork Freelancing

May 2026 – Present

Developed and maintained a secure internal platform for large-scale Instagram data collection, proxy management, account orchestration, and automated scraping operations.

- Engineered distributed automation workflows for processing large volumes of Instagram profile data across multiple accounts and proxies.
- Built authentication and role-based access control for administrator and worker access.
- Developed administrative tooling for accounts, proxies, scraping tasks, activity logs, sessions, and system events.
- Implemented task distribution, proxy rotation, session recovery, account health monitoring, retries, and failure recovery for long-running scraping operations.
- Built configurable data-extraction workflows with bulk task imports, progress monitoring, filtering, dashboards, and structured exports.

Technologies: Next.js, TypeScript, Python, FastAPI, MySQL, MongoDB, REST APIs, JWT, Instagrapi, Docker, Render

Frontend Developer - Upwork Freelancing

Jan 2026 - Jan 2026

- Developed responsive and reusable user interface components using modern frontend development practices
- Translated Figma designs into pixel-perfect, production-ready web interfaces
- Optimized applications for cross-browser compatibility, responsiveness, and consistent user experience across devices
- Collaborated with clients to transform design requirements into maintainable frontend solutions

Technologies: HTML5, CSS3, Bootstrap, JavaScript, Git, GitHub

Frontend Developer - Upwork Freelancing

Jul 2023 - Jul 2023

- Developed responsive authentication interfaces including login and registration workflows using HTML5, CSS3, and JavaScript (ES6+)
- Implemented client-side validation to improve data integrity and enhance user experience
- Ensured cross-browser compatibility and responsive layouts across desktop, tablet, and mobile devices
- Delivered production-ready frontend features within project deadlines while maintaining code quality and usability standards

Technologies: HTML5, CSS3, JavaScript, Git, GitHub

PROJECTS

E-commerce - Fullstack Web Application

- Developed a production-ready full-stack e-commerce platform featuring secure authentication, product catalog, shopping cart, order processing, and Stripe payments
- Designed scalable REST APIs and normalized MySQL database architecture
- Implemented role-based administrative dashboard for product and order management
- Integrated Stripe payment processing with webhook-based order verification
- Applied rate limiting, request validation, and JWT authentication to secure backend services

Technologies: React , Bootstrap, CSS, Node.js + Express.js, RESTful APIs, WebSocket, WebHooks, Rate Limiting, CORS, Stripe Integration, MySQL, Git, Github, Docker, Zod, .ENV,

Driver Tickets App - Fullstack Learning Platform

- Developed a full-stack examination platform managing 1,000+ multimedia questions with structured content organization and exam workflows
- Designed scalable backend architecture, REST APIs, and database models to support efficient question management and content delivery
- Built responsive user interfaces and optimized application performance to deliver a seamless cross-device learning experience

Technologies: React.js, Node.js, Express.js, MySQL, JWT, REST APIs.

SKILLS & TECHNOLOGIES

Frontend: Next.js, React.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Charts.js

Backend: JavaScript, TypeScript, Python, Node.js, Express.js, Python, FastAPI RESTful API, WebHooks, WebSocket, OAuth, JWT , Instagrapi , Rate Limiting, CORS, Zod

Database & Integrations: MongoDB, MySQL, Stripe Integration, SendGrid, Third-Party Integration

Tools : Git, GitHub, Docker, Postman, Vercel, Railway, Render

EDUCATION & CERTIFICATIONS

Web Technology — SBA College

2026 - Present

Currently pursuing a Web Technology program focused on frontend web development, with an emphasis on building a strong foundation in modern web technologies and practical development skills.

Learning Docker — LinkedIn Learning

2025 Dec - 2025 Dec

Completed hands-on training in Docker and containerization, covering Docker images, containers, application packaging, container lifecycle management, and the fundamentals of deploying applications in isolated, reproducible environments.
